## HIGHLINE®

WINDOW CONTROLS

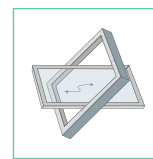

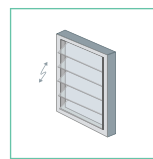

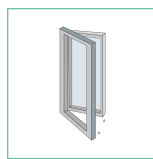

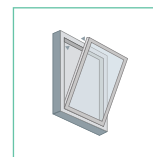

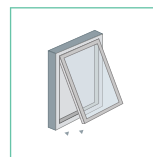

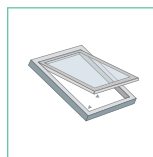

Manual window controls are used for operating high level or hard to reach windows. The system consists of a manual opener fitted to the opening vent linked via lengths of conduit and cable to a wall mounted operator.

The system is very flexible, as the conduit can be bent around obstructions to allow the operating handle to be positioned at an easy to reach location. Multiple vents can be operated from a single operator.

Various types of operators are available from the most popular Midi Operator to the Maxi Operator for heavier window loads. The system can be fitted to most styles of windows and even be used on rooflights when used with a screwjack opener.

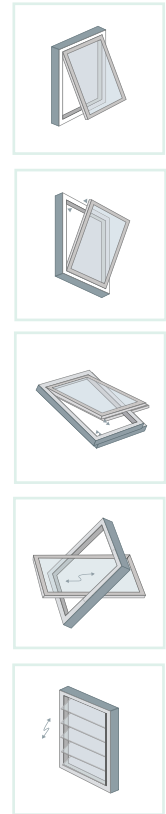

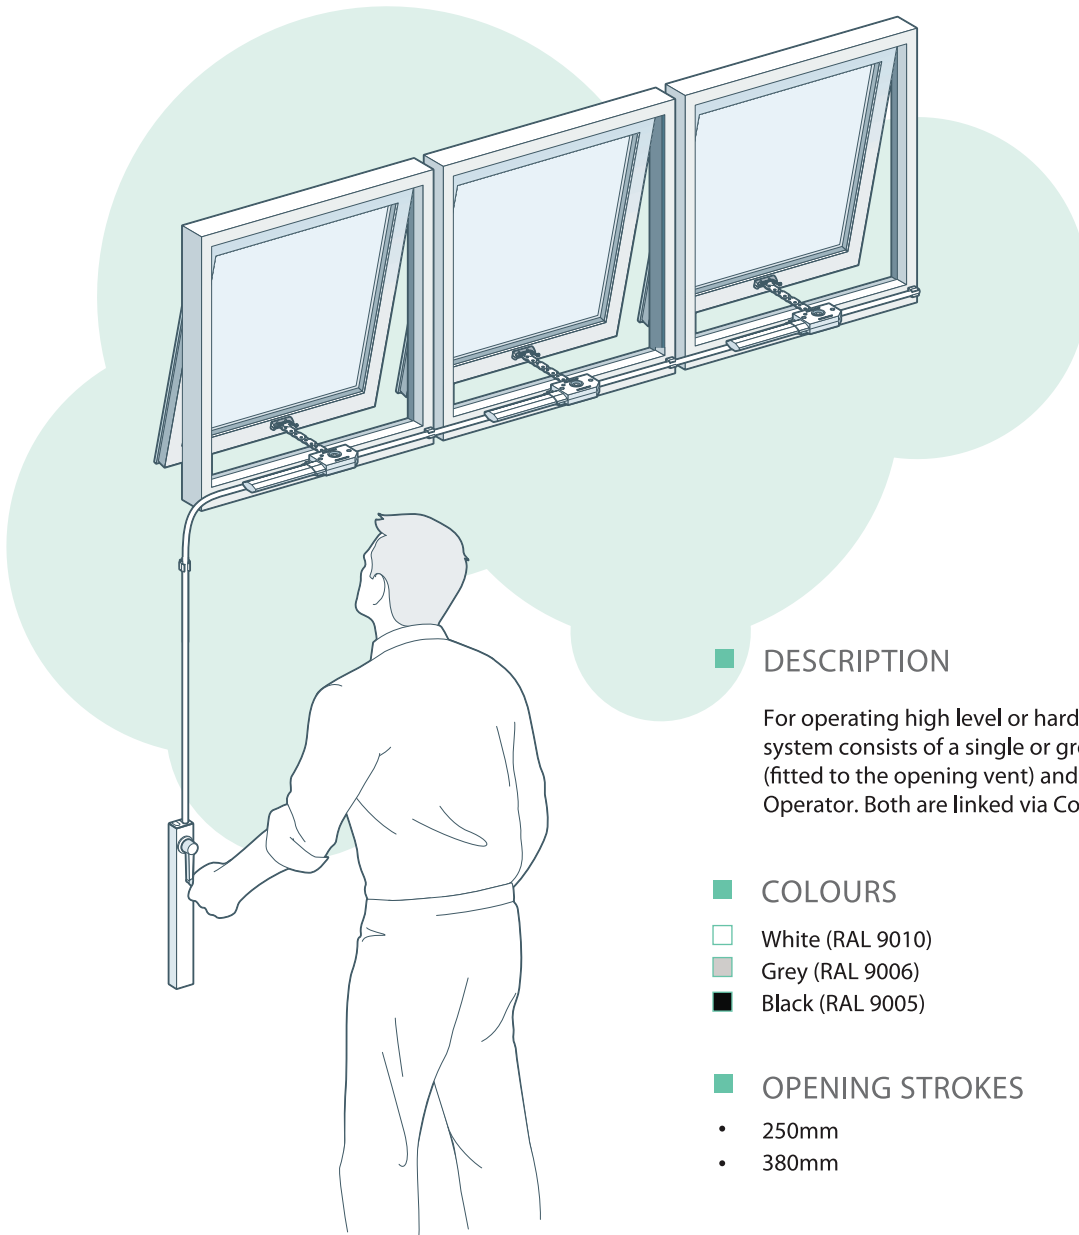

## WINDOW TYPES:

# HIGHLINE WINDOW SYSTEM

## MANUAL WINDOW CONTROL

### DESCRIPTION

For operating high level or hard to reach windows. The system consists of a single or group of manual Openers (fitted to the opening vent) and a wall mounted Operator. Both are linked via Conduit & Cable.

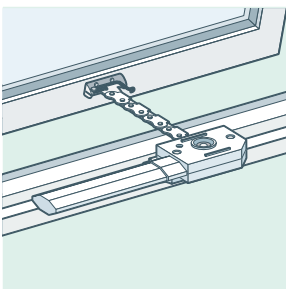

### COLOURS

- White (RAL 9010)
- Grey (RAL 9006)
- Black (RAL 9005)

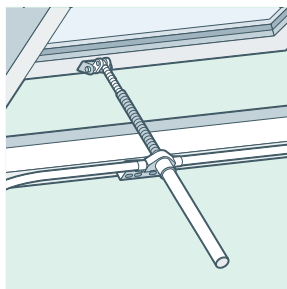

### OPENING STROKES

- 250mm
- 380mm

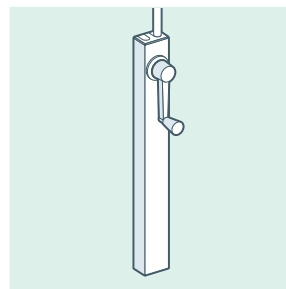

### FEATURED PRODUCTS

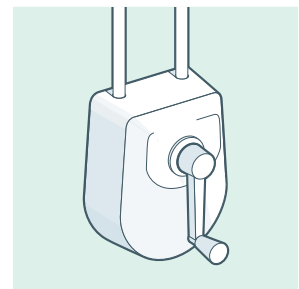

Chain Opener

Screwjack Opener

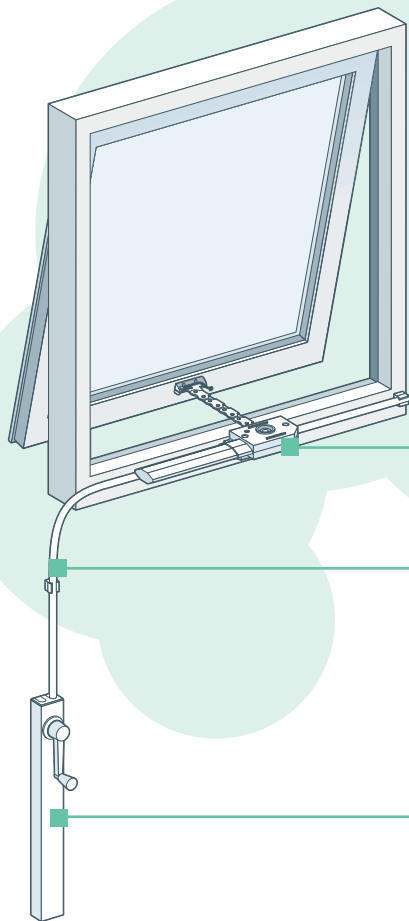

Midi Operator

Maxi Operator

“...the solution for most casement types.”

**CHAIN OPENER**

Fixed to outer frame of the opening vent. When cable is driven through it's inner cog the chain inside the opener will push open or pull close the window.

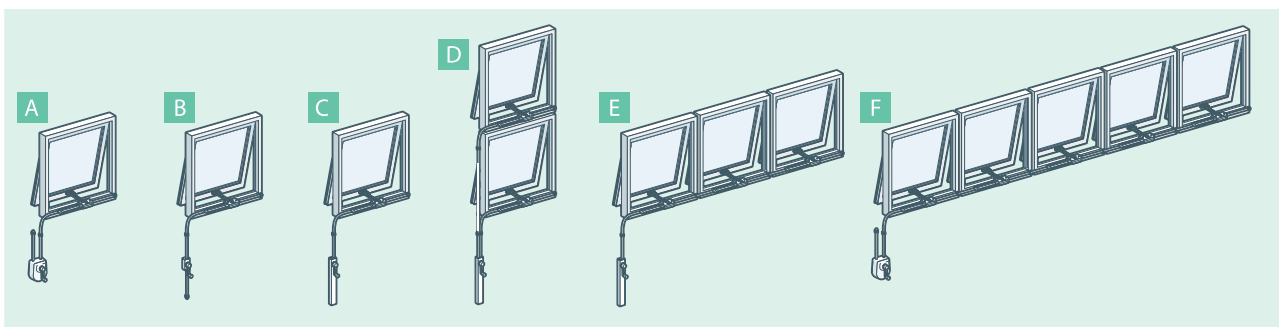

**CONDUIT**

Plastic covered metal tube with nylon inner liner. Used to house inner cable which is driven from Operator to Opener.

**MIDI OPERATOR**

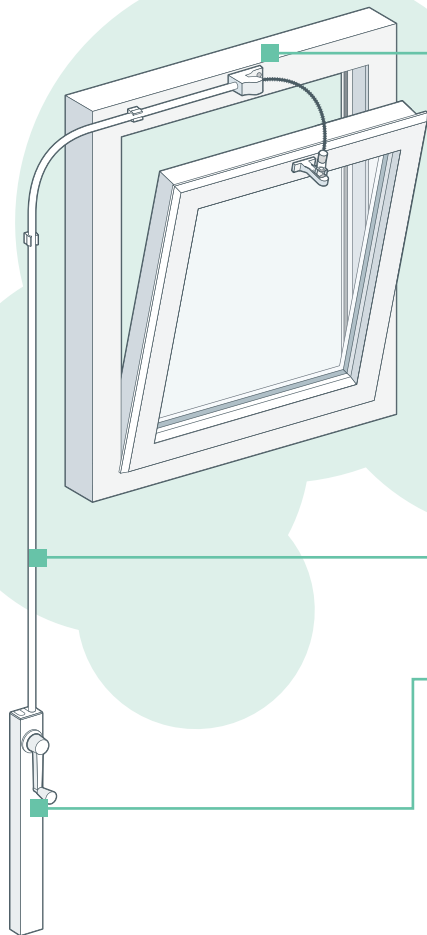

Used to wind inner cable through conduit. The handle can be turned one way to Open the window or turned the other way to Close.

**EXAMPLES**

## LOCKING OPENER

“...the solution for inward opening windows.”

### LOCKING OPENER

Fixed to outer frame of the opening vent. When cable is driven through the unit the opener will push open or pull close the window.

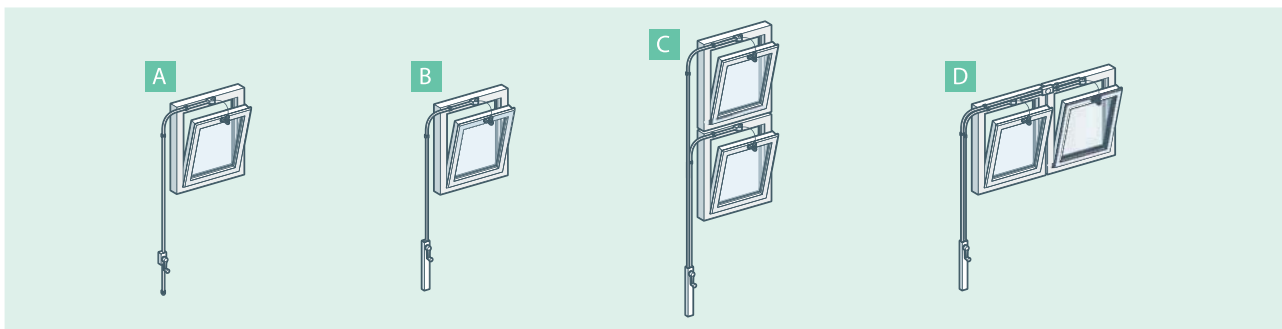

### CONDUIT

Plastic covered metal tube with nylon inner liner. Used to house inner cable which is driven from Operator to Opener.

### MIDI OPERATOR

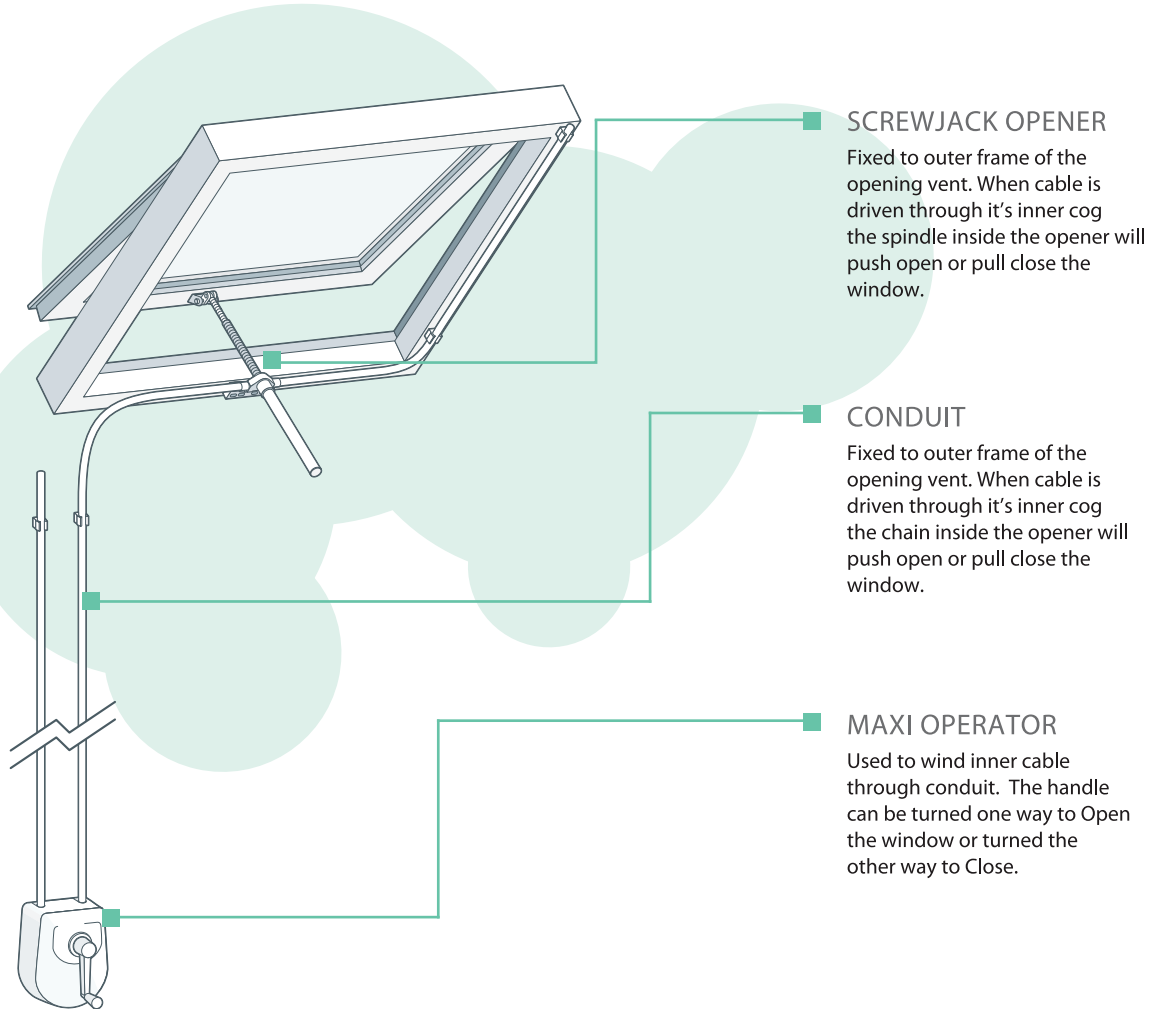

Used to wind inner cable through conduit. The handle can be turned one way to Open the window or turned the other way to Close.

## EXAMPLES

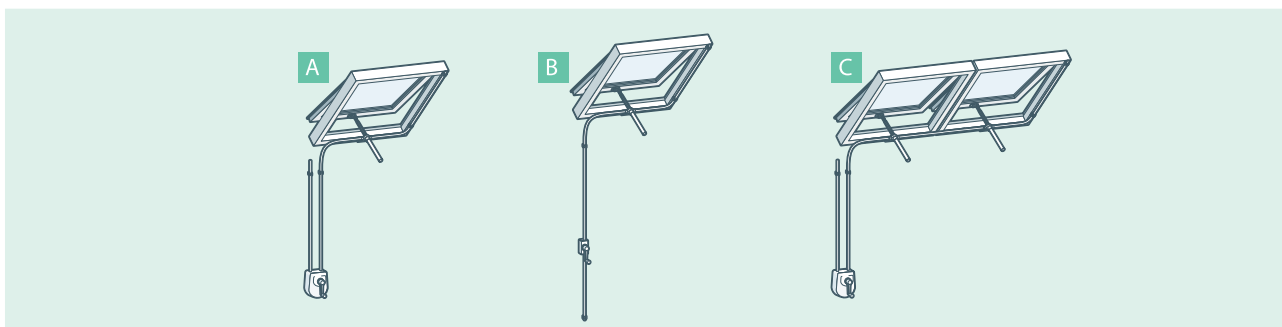

“...the solution for roof vents & sky lights.”

## SCREWJACK & POLE

Screwjack & Pole systems are used for operating high level pitched roof windows.

The system consists of a Screwjack Opener & Winding Pole. The Winding Pole is hooked onto the Screwjack Opener and wound to drive the window Open or Closed.

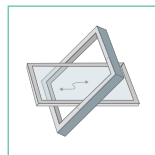

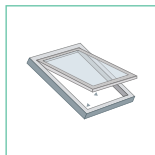

The system is a cost effective solution in comparison to other ventilation methods. Ideal for use in conservatories or environments that can become hot and stuffy.

Parts can be ordered in Polished Brass or Polishes Chrome finish and come in a range of opening sizes and pole lengths.
